João Paulo Ferreira de Souza

DevOps Engineer | Azure | Azure DevOps | CI/CD | Terraform | Kubernetes

Itapecerica da Serra, SP joao.ferreiradesouza@gmail.com (11) 91921-5622 joaopfsouza

Summary

DevOps Engineer with 7+ years of experience in CI/CD, infrastructure as code and Azure. Started as an intern at Kroton Educacional, moved up to analyst and was promoted to engineer, building and maintaining pipelines for multiple teams throughout. B.Eng. in Electrical Engineering from UNESP.

Worked in education, technology and fintech, supporting several teams at once under SAFe and Scrum. Hands-on experience with Docker, Kubernetes (AKS) and Helm in deployment pipelines, and with Azure and AWS environments.

Cloud & IaC: Azure as the main platform, with provisioning through Terraform, Bicep and ARM Templates.

CI/CD & Automation: Built and maintained pipelines on Azure DevOps for a wide range of tech stacks, plus proofs of concept on GitHub Actions and GitLab CI/CD. Automation in PowerShell and shell scripting.

DevSecOps & Quality: Integrated SonarQube into CI/CD pipelines at several companies. Supported the evaluation of SAST and DAST tools and the first Checkmarx and Acunetix rollouts in pipelines. Experience working in a PCI DSS environment.

Operations & Support: Production support and administration of Azure DevOps and SonarQube. Experience working in an ITIL environment.

Microsoft Certifications: DevOps Engineer Expert (AZ-400) · Azure Administrator Associate (AZ-104) · Azure Fundamentals (AZ-900)

Objective

DevOps Engineer role on a team that values automation, quality and continuous delivery in multi-cloud environments.

Education

B.Eng. Universidade Estadual Paulista (UNESP), Electrical Engineering — Bauru, SP — 2011 – 2018

- Undergraduate research scholarship (PIBIC/REITORIA/UNESP, 2012–2013): research on multi-agent algorithms for mobile robots with ultrasonic and infrared sensors.

Experience

ACQIO, DEVOPS ENGINEER — São Paulo, SP
Infrastructure & DevOps team at a fintech running mainly on Azure. Worked on migrations, CI/CD pipelines, Terraform and production support. — July 2024 – May 2026 (1 year 11 months)

- **Data & Messaging**: Migrated PostgreSQL on Azure from Single Server to Flexible Server. Took over an already-built Debezium/Kafka connector linking SQL Server to Elastic Cloud and handled its testing, validation and production deployment.
- **CI/CD & Automation**: Worked with the team on build and deploy pipelines in Azure DevOps for Kotlin, Go and Django apps, using Docker and Helm-based Kubernetes deployments. Ran quick proofs of concept for Dependency Check (dependency scanning) and for AI-assisted code review on pull requests.
- **Modernization & IaC**: Worked with the team on moving legacy Cloud Services to containers (ACI and App Services), provisioned with Terraform.
- **Security**: Replaced SSL/TLS certificates for AKS, App Gateway and Cloud Services, coordinating with vendors, and wrote a step-by-step wiki for the process. Worked with the team on integrating SonarQube with Entra ID through SAML.
- **Networking**: Updated the Terraform for an existing Site-to-Site VPN to add a new configuration, and renewed the client certificate for the Point-to-Site VPN.
- **FinOps**: Tracked and monitored cost optimization initiatives, including rightsizing idle resources and managing Reserved Instances (Reservations) in Azure and Databricks, which improved visibility into cloud spending.
- **Operations**: Administered the Azure environment, plus Azure DevOps and SonarQube in a PCI DSS-audited environment (permissions, resource creation, configuration and upgrades). Worked with the team on AWS, Elastic Cloud, Kubernetes and MongoDB Atlas administration. Supported production systems and took part in Scrum ceremonies.
- **Exposure**: Followed the PCI DSS compliance effort, an ExpressRoute version migration and the Elastic monitoring work, building a few charts in Elastic to learn the tool.

SOLUTIS TECNOLOGIAS, DEVOPS ANALYST — Salvador, BA
DevOps point of contact for several development teams in an ITIL environment. — June 2023 – June 2024 (1 year 1 month)

- Set up CI/CD pipelines, created repositories and integrated SonarQube for those teams, and helped spread DevOps practices across them.
- Built pipelines and templates on Azure DevOps Server 2022 and used PowerShell scripts in the pipelines to automate some tasks.

KUMULUS, CLOUD & DEVOPS ANALYST — Campinas, SP
Azure and DevOps consultancy, delivering turnkey infrastructure and CI/CD projects to a range of clients. — June 2022 – Feb 2023 (9 months)

- Built CI/CD pipelines on Azure DevOps for .NET Core, .NET Framework, Node.js and Angular applications. Ran proofs of concept on GitHub Actions and GitLab CI/CD.
- Wrote the infrastructure as code, with Bicep/ARM Templates and Terraform, for the projects' development, staging and production environments.
- Provisioned Data Factory, Synapse Analytics and Databricks resources through the Azure portal for data and Data Science projects.
- Deployed Azure infrastructure and helped development teams work with Git.

KROTON EDUCACIONAL, DEVOPS ENGINEER — São Paulo, SP
Promoted to engineer within the same team, with technical ownership of CI/CD and IaC across multiple repositories. — Nov 2019 – Oct 2021, 2 years

- **CI/CD**: Built and maintained Azure DevOps pipelines for Docker, Kubernetes, .NET Core, .NET Framework, Node.js, Python, Gradle and Maven, plus the PL/SQL build. Worked with the team on the PHP and SQL Server pipelines and on the PL/SQL deployment.
- **IaC**: Provisioned Azure environments with ARM Templates and Terraform, run through Azure DevOps pipelines.
- **Security**: Supported the consultancies that evaluated SAST and DAST tools, and helped the consultancy with the first Checkmarx (SAST) and Acunetix (DAST) rollouts in the pipelines of several applications.
- **SAFe**: Member of the System Team, supporting continuous integration across 5 to 10 squads.

KROTON EDUCACIONAL, DEVOPS ANALYST — Valinhos, SP
Hired full-time on the same DevOps team after the internship. — Aug 2018 – Nov 2019, 1 year 4 months

- Built CI/CD pipelines on TFS 2018/VSTS (now Azure DevOps) with PowerShell scripts for several development teams.
- Configured Windows and Linux build agents for TFS 2018 and integrated pipelines with SonarQube/SonarCloud, with quality gates for several projects.
- Introduced DevOps practices to the development squads, with a focus on continuous integration.
- Co-supervised the team's interns and helped spread DevOps culture across the company.

KROTON EDUCACIONAL, DEVOPS INTERN — Valinhos, SP
Internship on the DevOps team, working on deployment automation, builds and version control in TFS. — July 2017 – Aug 2018, 1 year 2 months

- Automated on-premises deployments with PowerShell and TFS 2015/TFS 2018, replacing manual deploys and reducing release errors. This automation became the base of the CI process that evolved over the following years.
- Improved the .NET and Oracle PL/SQL builds, with code quality analysis in SonarQube.
- Managed branches, permissions and version control in TFS for several teams.

Certifications

- **Microsoft Certified: DevOps Engineer Expert (AZ-400) (07/2023 – 07/2027)**
- **Microsoft Certified: Azure Administrator Associate (AZ-104) (01/2023 – 01/2028)**
- **Microsoft Certified: Azure Fundamentals (AZ-900) (2020)**
- **DevOps Essentials, 4Linux (2021, 20 hours)**
- **Introdução ao DevOps (Introduction to DevOps), desenvolvedor.io (2020, 40 hours)**

Languages

English: Intermediate reading; basic listening, speaking and writing.

Skills

Orchestration & Containers: Kubernetes (AKS), Docker, Helm

Cloud Platforms: Azure (AKS, ACI, App Services, App Gateway, Entra ID), AWS

Infrastructure as Code (IaC): Terraform, Bicep, ARM Templates

CI/CD & Automation: Azure DevOps (TFS/Azure DevOps Server); GitHub Actions and GitLab CI/CD (PoC)

Programming & Scripting: PowerShell, Bash, YAML, JSON, HCL, Python (self-study)

Security & Quality: SonarQube, SAST (Checkmarx), DAST (Acunetix), SSL/TLS

Databases & Messaging: PostgreSQL, SQL Server, Elastic Cloud, Kafka, Debezium

Methodologies & Frameworks: SAFe, Scrum, Kanban, ITIL
